WORK EXPERIENCE

Jan 21 /2024 – Apr 03/2026

IT Technician

Internet Service Office(TriSTAR) – Kandahar

Responsibilities:

- Designed, implemented, and maintained enterprise **LAN/WAN** network infrastructure to ensure secure and reliable connectivity.
- Configured and managed **Cisco switches, routers, and wireless access points**, including VLANs, Trunking, Static Routing, and OSPF routing protocols.
- Installed, configured, and administered **Windows Server** services, including **Active Directory, DNS, DHCP, Group Policy**, and user account management.
- Assisted in the deployment and administration of **VMware ESXi** and **Microsoft Hyper-V** virtualization environments.
- Supported the implementation and maintenance of **High Availability (HA)**, Failover Clustering, and Load Balancing solutions to improve system availability.
- Performed installation, configuration, monitoring, and troubleshooting of enterprise network infrastructure and server systems.
- Monitored network performance and proactively identified, diagnosed, and resolved hardware, software, and connectivity issues.
- Implemented network security policies to protect organizational infrastructure from unauthorized access and cyber threats.
- Configured and maintained enterprise firewalls, including **Sophos, Fortinet, and Cisco** security solutions.
- Established and managed **VPN** connections to provide secure remote access for authorized users.
- Implemented backup strategies and supported **Disaster Recovery** planning to ensure business continuity.
- Managed data center operations, including server installation, rack organization, power management, cooling systems, and infrastructure maintenance.
- Controlled internet access and optimized bandwidth utilization to improve network performance.
- Created and maintained **network diagrams**, technical documentation, system configurations, and operational procedures.
- Connected and integrated organizational systems with internal and external network services.
- Performed preventive maintenance, system updates, antivirus management, and security patch installation for servers and network devices.
- Maintained server rooms and network equipment to ensure continuous availability and operational efficiency.

- Coordinated with IT teams and technical stakeholders to resolve infrastructure issues and improve network services.
- Prepared annual operational work plans aligned with organizational objectives.
- Developed and implemented IT policies, procedures, and technical guidelines.
- Supervised, monitored, and evaluated the performance of technical staff while providing mentoring and technical guidance.
- Prepared periodic technical and management reports for senior management.
- Supported the planning and execution of IT infrastructure improvement projects.
- Performed additional technical and administrative duties as assigned by senior management.

Apr 1 /2022 – Nov 08/2023

IT Assistant

Organization: ACHRO

Responsibilities:

- Administered and maintained enterprise network infrastructure to ensure maximum uptime, security, and performance.
- Installed, configured, and optimized Cisco routers, switches, and wireless access points across LAN and WAN environments.
- Managed IP addressing schemes, VLAN implementation, routing protocols, and network segmentation to improve network efficiency.
- Performed continuous monitoring of network devices and proactively resolved connectivity, latency, and performance issues.
- Installed, configured, and maintained Windows Server environments, including Active Directory, DNS, DHCP, and Group Policy services.
- Deployed and managed virtualization platforms using VMware ESXi and Microsoft Hyper-V to improve infrastructure utilization.
- Supported server migration, virtualization projects, and infrastructure upgrades with minimal service interruption.
- Configured and maintained enterprise firewall solutions to strengthen network security and protect against cyber threats.
- Implemented secure VPN connectivity for remote users while maintaining organizational security policies.
- Performed routine server maintenance, software updates, patch management, and antivirus administration.
- Developed backup strategies and tested disaster recovery procedures to ensure data availability and business continuity.
- Maintained technical documentation, network topology diagrams, system inventories, and infrastructure records.
- Installed and maintained server hardware, storage systems, and network equipment within data center environments.
- Diagnosed and resolved hardware, software, server, and network failures using industry-standard troubleshooting methodologies.
- Collaborated with cross-functional IT teams to deploy new technologies and improve enterprise infrastructure.
- Delivered technical support and guidance to end users while ensuring timely resolution of service requests.
- Assisted in capacity planning and infrastructure expansion to support organizational growth.
- Ensured compliance with organizational IT policies, security standards, and operational procedures.
- Conducted preventive maintenance to maximize the reliability and availability of network and server infrastructure.
- Evaluated emerging technologies and recommended infrastructure improvements to enhance operational efficiency.

Feb 11 /2020 – Oct 03 /2021

IT Support Assistant**Organization: INTERSOS****Responsibilities:**

- Planned, implemented, and maintained secure enterprise network infrastructure to support business operations and organizational growth.
- Configured, monitored, and optimized Cisco networking equipment, including routers, switches, and wireless access points.
- Designed and managed network architecture using VLANs, inter-VLAN routing, trunk links, and dynamic routing protocols.
- Administered Windows Server environments, ensuring the availability of Active Directory, DNS, DHCP, and Group Policy services.
- Installed and managed Linux servers for infrastructure services, system administration, and network applications.
- Implemented virtualization solutions using VMware and Hyper-V to improve resource utilization and system scalability.
- Monitored server and network performance using administrative tools to ensure maximum uptime and service availability.
- Configured enterprise firewall policies, access control lists (ACLs), and VPN services to enhance network security.
- Performed advanced troubleshooting of network, server, and infrastructure issues to minimize downtime and improve productivity.
- Implemented regular backup procedures and disaster recovery solutions to safeguard organizational data and critical services.
- Maintained server rooms, network racks, structured cabling, UPS systems, and environmental controls according to industry standards.
- Managed software deployment, operating system upgrades, firmware updates, and security patch management.
- Assisted in developing annual IT operational plans and infrastructure improvement strategies.
- Coordinated network implementation projects with technical teams, vendors, and organizational stakeholders.
- Supervised daily technical operations and ensured timely completion of assigned tasks.
- Prepared infrastructure performance reports, incident reports, and technical documentation for management.
- Provided technical guidance and mentoring to junior IT staff to improve team performance.
- Collaborated with cross-functional departments to identify technology requirements and implement effective IT solutions.

Mar 18 /2019 – Nov 02/2019

Survey Assistant / Data Entry Officer**Organization : TSDO****Responsibilities:**

- Supported community profiling surveys and needs assessments for humanitarian assistance programs.
- Entered and verified large volumes of survey data with high accuracy and fast English typing speed.

- Assisted in maintaining organized digital databases and beneficiary records.
- Participated in training sessions on AAP, safeguarding, and data quality standards.

Language Skills

Dari: Professional Interpreter/Translator (A+)

Pashto: Professional Interpreter/Translator (A+)

English: Excellent (B+)

Development Skills

- Windows OS & Microsoft Office Installation
- Hardware Troubleshooting & Maintenance
- Network Basics (TCP/IP, DNS, DHCP)
- Printers & Copier Machines (Laser, Dot Matrix, Card Printers)
- CCTV & Camera Systems
- UPS, Power Adapters & Money Counter Machines
- IT Asset Registration & Inventory Management
- Preventive Maintenance & Cleaning
- Branch & On-site Technical Support
- Reporting (Weekly & Monthly IT Reports)

Computer / IT Skills

- Operating Systems: Windows, Linux, Mac OS
- *Networking: TCP/IP, LAN/WAN, Virtualization, Cloud Computing*
- Network Documentation, Backup & Recovery, Network Security Policies, Cisco Switching & Routing, OSPF, VLAN, Trunking, Server Administration, Network Performance Monitoring.
- *Software & Tools: MS Office, Microsoft 365, Git/GitHub, OneDrive, SharePoint.*
- *Programming: Java, C, C++, JavaScript, HTML & CSS.*
- *Databases: MySQL, SQL Server, MongoDB, Cassandra, QuickBooks.*
- *IT Support Skills: Troubleshooting, Software Installation, User Access, System Maintenance.*

Management Skills

- Team Coordination
- Technical Reporting
- Annual Work Planning
- Staff Supervision
- Performance Monitoring
- Documentation
- Problem Solving
- Risk Management

OTHER TRAININGS

- Practical knowledge of Network+ and CCNA (Cisco Certified Network Associate) topics
- Online CCNA 200-301 Course - Simplilearn
- Online Fundamental of Database, SQL for Data Analysis - Simplilearn

- Familiar with CCNP, MTCNA, MTCNE, MTA, and MCSA concepts
- FITTEST Training - conducted by WFP
- Online C programming language - Sololearn
- 6-Months Computer Course (ICDL)- XPERT International Training & Testing Center - Graduated
- Joya Professional Learning Center, Herat - Graduated
- Muslim English Language Institute, Herat - Graduated

EDUCATIONAL INFORMATION

06/2021 – 07/2025 **Degree: Bachelor of Computer (General)**
University: Kandahar university

03/2008 – 12/2020 **High School Diploma**
Hiwad 3 Private Boys High School Herat

SUMMARY

Highly skilled and detail-oriented IT Technician with over 5 years of hands-on experience providing technical support in corporate and branch-based environments. Results-driven **Computer Science graduate** with a strong foundation in enterprise networking, systems administration, and IT infrastructure management. Experienced in configuring and maintaining LAN/WAN networks, Cisco routing and switching, Windows Server administration, virtualization technologies (VMware & Hyper-V), and network security solutions. Skilled in troubleshooting complex technical issues, implementing secure and reliable IT infrastructures, and supporting business-critical systems. Passionate about delivering innovative technology solutions, improving operational efficiency, and ensuring high availability of enterprise networks while collaborating effectively with multidisciplinary teams.
